

I would like to express my concern regarding the potential that LPFM stations would be given priority over current FM translator services. Specifically, AIR 1 serves an extremely valuable service to the Vancouver community through their broadcasting of Christian alternative music. This unique content is not served by any other Vancouver/Portland stations, and would not likely be replaced. The service provided by AIR 1 contributes to the diversity of FM Radio offering, and AIR 1 specifically provides a positive music source to the area's youth.
